EDUCATION

Clark University

M.S. in Data Analytics

GPA: 3.84/4.0

Related courses: Applied Machine Learning, Digital Health Applications and Architecture, Fundamentals of Data Engineering, Data Mining using Splunk.

May 2025

Worcester, MA

Kakatiya Institute of Technology and Science

B.Tech. in Electrical and Electronics Engineering

GPA: 3.56/4.0

Related courses: Basic Electrical Engineering, Power Systems, Renewable Energy Systems, AI Techniques in Electrical Engineering, Signals & Linear Systems.

June 2023

Warangal, India

RESEARCH INTERESTS

Machine Learning (ML), Health Informatics, Big Data Analytics, Computational Systems Science, Model Explainability (XAI), Deep Learning, Predictive Modeling, Systems Optimization.

PROFESSIONAL EXPERIENCE

American Red Cross

Data Analyst

Jul 2025 - Present

Remote, USA

- Managed data integrity and pipelines by standardizing 2,000+ monthly records and cleaning 10K+ complex multi-source datasets using SQL and Excel.
- Streamlined operations by automating four critical audit workflows, achieving a direct saving of 25 operational hours per month.
- Delivered actionable insights by conducting trend analysis and designing Tableau dashboards for real-time decision-making.

Johnson & Johnson

Data Science and Digital Health Intern

Jan 2025 - Jun 2025

Boston, USA

- Developed and Trained Deep Learning models (TensorFlow/PyTorch) for cardiac anomaly detection from 25,000+ images, directly advancing diagnostic precision.
- Built high-efficiency preprocessing pipelines for multimodal datasets, successfully reducing model training runtime by 40 hours per experiment cycle.
- Processed and analyzed 800K+ patient records using Python and SQL to identify clinical risk patterns and inform research outcomes.

Pfizer

Research and Development Intern

May 2022 - Jul 2023

Hyderabad, India

- Interned at Pfizer R&D, developing and validating ML models (Python/Scikit-learn) to predict compound viability, enhancing early-stage drug discovery and supporting research.
- Optimized experimental workflows and automated data pipelines, reducing manual processing by 30 hours/month and increasing throughput of compound testing by 30%, boosting R&D productivity.
- Standardized and documented research data procedures across multiple projects, ensuring reproducibility, compliance, and reliable integration of experimental results.

SKILLS/HOBBIES

Programming Scripting	Python, R, SQL, C/C++, MATLAB, Shell
Machine Learning	TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM
Data Analysis & Visualization	Pandas, NumPy, Tableau, Power BI, Matplotlib
Databases & Cloud	MySQL, PostgreSQL, MongoDB, AWS
Tools	Git, Excel
Hobbies	Photography, Cycling, Reading
